

PROJECT	BASE CORE FEE	AI PLAN OPTIONS	INFRASTRUCTURE
SeekFactory (Web + App + Backend)	₹1,50,000 INR (1.5 Lakhs)	₹90k / ₹160k / ₹200k INR	Spring Boot 4 + Qwen / DeepSeek

1. Executive Summary & Strategy

SeekFactory connects Indian & global industrial buyers with verified Chinese & global manufacturing plants through an interactive video-first discovery model. This proposal outlines the **three structured AI expansion plans** designed to systematically automate discovery, technical translation, RFQ creation, video localization, and cross-border customs logistics.

2. Investment Tiers: Plan 1, Plan 2 & Plan 3

PLAN 1: CORE AI ₹90,000 Discovery & Live Translation ✓ AI Sourcing Concierge ("Ask SeekFactory" Smart Matchmaker via RAG) ✓ Real-time Technical B2B Translation (English / Hindi ⇄ Simplified Chinese) ✓ PostgreSQL pgvector database extension setup ✓ Bilingual industrial terminology prompt tuning ✓ Spring Boot 4 AI Service with SSE real-time streaming Timeline: ~2 Weeks · Essential Base	POPULAR PLAN 2: GROWTH AI ₹1,60,000 Procurement Automation & Media AI ✓ Everything in Plan 1 (Features 1 & 2) ✓ Smart RFQ Builder (Spec, drawing & notes auto-extractor) ✓ Reels Video Auto-Transcription & Bilingual Subtitles ✓ Supplier Quotation Comparator & Decision Risk Engine ✓ Video speech-to-text pipeline (Whisper / Qwen-Audio) ✓ Multi-supplier landed cost comparison matrix Timeline: ~3.5 Weeks · Core Workflow	COMPLETE PLAN 3: ENTERPRISE AI ₹2,00,000 Autonomous Sourcing & Logistics ✓ Everything in Plan 1 & Plan 2 (All 5 Features) ✓ Visual "Snap to Source" (Reverse Image & Part Matcher via Vision AI) ✓ India-China Landed Cost & Customs Duty Calculator (HS Code AI with BCD/SWS/IGST) ✓ Reels Algorithmic Personalization Engine (Buyer behavioral video feed) ✓ Multimodal Vision pipeline (Qwen-VL / DeepSeek-VL) ✓ Official Indian ITC-HS customs tariff schedule integration Timeline: ~5 Weeks · Full Platform

3. Feature Matrix Across Plans

FEATURE MODULE	PLAN 1 (₹90K)	PLAN 2 (₹160K)	PLAN 3 (₹200K)
1. AI Sourcing Concierge (Natural language database search)	✓	✓	✓
2. Real-time B2B Chat Translation (EN/HI ⇄ ZH technical jargon)	✓	✓	✓
3. Smart RFQ Builder (Spec extraction & JSONB auto-generation)	—	✓	✓
4. Reels Video Auto-Transcription & Subtitles (Mandarin to EN)	—	✓	✓
5. Supplier Quotation Comparator (Multi-quote evaluation)	—	✓	✓
6. Visual "Snap to Source" (Reverse photo part recognition)	—	—	✓
7. India-China Landed Cost & Customs Duty Calculator (HS Code AI)	—	—	✓
8. Reels Algorithmic Personalization Engine (Buyer recommendation feed)	—	—	✓

4. Comprehensive Specifications of the 8 Features

Feature 1: AI Sourcing Concierge ("Ask SeekFactory" / Smart Matchmaker)

Included in Plan 1, 2, 3

Buyers type or speak complex industrial requirements (e.g., "5-axis CNC milling for SS316, tolerance $\pm 0.01\text{mm}$, batch of 1,000 with material test certs"). The AI matches verified factories directly from your PostgreSQL database using semantic vector search and suggests direct contact or pre-filled RFQ creation.

Tech: PostgreSQL pgvector + Alibaba Qwen / DeepSeek LLM + Spring Boot WebClient with SSE streaming.

Feature 2: Real-time Technical Translation in B2B Chat (EN/HI $\rightleftharpoons$ ZH)

Included in Plan 1, 2, 3

Integrates directly into the existing InteractiveChatView. Indian buyers type naturally in English or Hindi; Chinese factory engineers receive grammatically precise Simplified Chinese with preserved mechanical engineering nomenclature (e.g., *EDM wire cutting, anodizing thickness, draft angles*). Factory replies in Mandarin appear instantly in English.

Tech: Dual-language prompt cache + domain-specific mechanical engineering glossary injection.

Feature 3: Smart RFQ Builder (Spec & Drawing Extractor)

Included in Plan 2, 3

Eliminates RFQ abandonment. The buyer uploads a 2D engineering drawing (PDF/image) or rough notes. AI auto-populates Product Name, Target Category, MOQ, Suggested Incoterm (FOB/CIF), Currency, and constructs the structured specs JSONB dictionary automatically.

Tech: Multimodal document parser + JSON schema constrained output validation in Spring Boot.

Feature 4: Reels Video Auto-Transcription & Bilingual Subtitles

Included in Plan 2, 3

Chinese plant managers upload reels speaking Mandarin while demonstrating equipment. The AI extracts the audio, transcribes it, generates synchronized English subtitles, and outputs SEO titles, technical descriptions, and hashtags (e.g., #LaserCutting, #ForgingLine).

Tech: Whisper / Qwen-Audio speech-to-text + automated WebVTT/SRT subtitle generation and embedding.

Feature 5: Supplier Quotation Comparator & Recommendation

Included in Plan 2, 3

When an RFQ receives multiple quotes from different factories, the buyer gets an intelligent comparison matrix evaluating total landed cost, lead times, factory verified status, and potential delivery risks with an objective AI score.

Tech: Multi-factor scoring algorithm in Spring Boot analyzing rfq_quotes records.

Feature 6: Visual "Snap to Source" (Reverse Image & Part Matcher)

Included in Plan 3 Only

A buyer holds a broken gear, specialized casting, or custom industrial part in their plant. They snap a photo via the mobile app. Multimodal Vision AI detects the component type, manufacturing process (e.g., casting vs CNC), and estimated material, then retrieves matching factories immediately.

Tech: Qwen-VL / DeepSeek-VL vision embeddings + image similarity indexing.

Feature 7: India–China Landed Cost & Customs Duty Calculator (HS Code AI)

Included in Plan 3 Only

Removes buyer fear of hidden import costs. For any product or quote (e.g. \$5,000 FOB Ningbo), the AI classifies the 8-digit Indian Customs ITC-HS code and calculates Basic Customs Duty (BCD), Social Welfare Surcharge (SWS), IGST (18%), and estimated freight to determine the exact landed price in INR.

Tech: Indian CBIC Customs Tariff schedule database + dynamic tax estimation engine.

Feature 8: Video Reels Algorithmic Personalization Engine

Included in Plan 3 Only

Industrial TikTok-style recommendation feed. Analyzes buyer watch time, pauses on machine specs, and past RFQs to dynamically rank the "For You" feed—ensuring textile buyers see textile machinery, and automotive buyers see precision stamping reels.

Tech: Collaborative filtering & interaction telemetry scoring in Spring Boot.

5. Cross-Border Architectural Compliance (China $\rightleftharpoons$ India)

 **Critical Network & Legal Guarantee:**

Mainstream Western models (OpenAI, Claude, Gemini) are **blocked by the Great Firewall (GFW) in mainland China**. By deploying **Alibaba Cloud Qwen** and **DeepSeek** through our Spring Boot backend proxy (hosted in Singapore/Mumbai), SeekFactory guarantees 100% legal, unblocked, and high-speed operation for both Indian buyers and Chinese suppliers without requiring VPNs.
